

Welcome to submodule 2 “implementation in practice of the Blended Learning process of Flip Edu Up Project!

If you are here, it means you have already completed Module 1 which is introduction part of the blended learning. Before you will continue with submodule 2 it is important that you have a clear overview of what you are approaching now and what is the usefulness of the Online Tools, we are going to present you.

This course is about online tools used in blended learning. And you will have the opportunity to gain comprehensive and in-depth knowledge of these blended learning online tools.

Nowadays, with the gradually replacing face-to-face communication with online tools, the concept of blended learning has emerged, and online tools have gained importance. Especially in Blended Learning, we have compiled for you the online tools that can be encountered in almost every moment of our lives.

In general, every online tool introduction is divided into two parts, more user guide and usefulness. The basic online tools are divided as follows:

- Communication tools
- Learning Management System (LMS) Tools
- Online Storage Tools,
- Website Builder,
- Task Management,
- Assessment tools.

Within the scope of this section, the most used and recommended online tools in blended learning have been selected. These are:

Google Meet

Communication is one of the most important elements in blended learning. In this context, online tools have always been a savior when face-to-face communication is not possible. Google Meet is one of them and the most used! Let's discover how to use it together!

MOODLE and blackBOARD

A common function of a *Learning management system (LMS) tools* is to store and share learning materials such as documents, presentations, tests, and the like. Get ready to learn the online tools that we will talk about in terms of providing learning skills through online tools!

Google Drive

If you don't have an LMS, don't worry! You can easily upload your learning material online so you can share the link to the learning material via email, messaging or QR code! In this, we will tell you the most used Google Drive online tool!

WordPress

You can easily create your own website with WordPress, which you can use in blended learning, either in face-to-face training or online! Let's take a brief look at how we can create a website together in the simplest way!

Trello

Task management and brainstorming guide for adult teachers and students in blended learning! That's why we offer you two of the most useful and easy online tool!

Kahoot

What should we do when we think we have gained all the knowledge and competencies in blended learning? Of course we have to test ourselves!

Let's have fun with Kahoot!

Finally, you will have a **Self-Assessment test** to test what you have learned!

Please note that each Online Tool has its own GDPR rules and privacy setting, you are kindly invited to check them, the output leader organization does not take any responsibility of potential issues with the use of Online Tools.

We warmly suggest you use those tools in order to contribute to your blended learning process, during this short video session we are going to explain you the usefulness of each of these Tools.

There is probably hardly anything that does not already exist. You just haven't discovered it yet. Let's discover them! Fruitful and enjoy full Lessons!
